HEATHER POTTEN

I work with natural wools and silks to create art pieces and wearable accessories from hand felted material. I discover ideas for textures and shapes in the natural environment. With different wools, I experiment with colour and pattern. I want to show how soft and sculptural felted wool can be, as well as warm. I aim to create pieces that challenge the way people perceive felt, to show that it has great strength and form, as well as beauty. Decorative details are a signature feature of my 3D work.

Added Value - Workshops

Heather offers sell-out workshops in wool felting in Edinburgh and elsewhere. She offers a full demonstration of blending wools, using other fibres, laying out the felt, designing templates and fine finishing. She helps participants create their own designs, and encourages them to experiment with colour and texture. Heather's workshops are renowned for being intensive and energetic, and also fun.

Each product is handmade, and bespoke. Delivery is normally around three weeks.

Heather Potten is supported by a marketing and public relations agency and is active on social media.

A wholesale price list is available.
